At Gulf Plastic Industries, we are committed to offer quality products through best in class materials and advanced technology production infrastructure

Thus offering you Customized and sustainable FIBCs

ABOUT US

Gulf Plastic Industries stands as the market leader in the production of flexible intermediate bulk containers (FIBC), polypropylene woven sacks, FFS Bags (FFS heavy-duty PE Film), and plastic disposable products. Our unwavering commitment to continuous product innovation, coupled with the utilization of advanced manufacturing technologies, ensures that we consistently deliver superior quality products to our valued customers. With a relentless pursuit of excellence, we strive to push the boundaries of innovation, setting new industry standards and exceeding customer expectations at every turn.

Strategically located within the Rusayl Industrial Estate in Muscat – a short distance from the major airport and seaport – Gulf Plastic Industries has capitalised upon its position as Oman's exclusive producer of flexible intermediate bulk containers (also known as jumbo or bulk bags) to develop into a prominent local and international supplier of world-class plastic products. The company, which commenced its operations in 1998, boasts an impressive track record of innovation and with a facility equipped with machinery sourced from world-leading European suppliers, has succeeded in developing a diverse product portfolio which conforms to the most stringent international standards.

Tailored Solutions, Unmatched Versatility: Discover the Perfect FIBC for Your Needs

Our standard FIBCs
(Jumbo or Bulk bags)

Circular Bags : Circular bulk bags have a circular/tubular woven fabric body that is seamless. With only a top and bottom panel sewn into the bag, circular style bags are ideal for fine and hygroscopic materials. This is for easy fork lift handling.

U Panel Bags : U-Panel bulk bags have one continuous piece of fabric for a side, bottom and opposite side panel creating a "U" shape. The remaining sides and top panel are then sewn in to construct the bag. U-Panel bags are an industry standard and provide a great stack-ability

4 Panel with Baffle Bags : Baffled bulk bags are constructed with four internal baffles (pieces of woven fabric with holes cut for material to pass through) sewn from one side wall to an adjacent side wall. The baffles help to keep the square shape and smaller filled dimensions Baffled bags are ideal for products with good "Flow-Ability and must meet strict bag size requirements such as shipping containers or limited fill/discharge space.

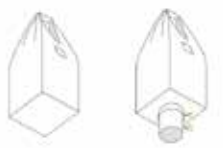

Sling Bag : Special types of bags with slings sewn all over the corners and in the bottom of flat fabric. An ideal solution for Carrying 25 to 50 kgs bags in bulk shipments.

Tunnel Lift Bags : Tunnel bulk bags lifting loops are constructed with the body of the fabric which enables greater strength to the bag.

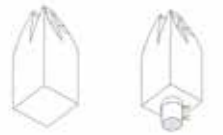

Single Loop Bag / Two Loop Bags : Use for 500 to 1000 Kg. Safe Working Load (SWL) specifically for agricultural manures.

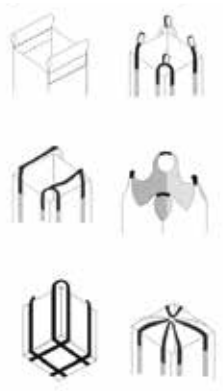

Types of Single Loop

Types of two Loops

Types of custom Loops

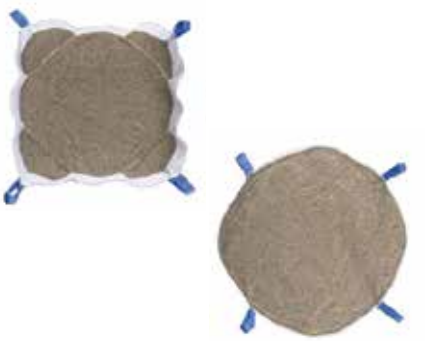

Types of filling Spout

Types of discharge Spout

Specialized types of Our FIBCs

Formstable FIBCs

Formstable FIBC maintains its straight sides. Bulging is prevented, and the entire package fits cleanly within the footprint of a pallet. This provides several money-saving benefits to customers.

Optimal transport loading-up to 30% more volume of your product can be packed in an ISO container or truck.

More efficient warehouse storage.

Enhanced stability in stacking and transport- greater product protection and safer for workers

Hazardous material FIBCs

Around the world, the transportation of hazardous products is regulated within a framework established by the United Nations (UN) Subcommittee of Expert on the Transport of Dangerous Goods. It provides consistent international guidelines to prevent accidents and damage to people, property, and the environment. With Gulf Plastic Industries, you're leveraging a team that can make certain your FIBCs for hazardous materials have been designed, tested, and manufactured within complete adherence to these UN regulations.

Container Liners

Container Liners are used as a single bulk packaging solution within standard ISO containers for dry and flowable products including seeds, grains, malt, minerals, pellets, granular and resin products. We offer container liners with filling and discharge spouts supported by vents for air discharge.

Easy package and discharging

Cost effective solution.

Distinctive features of Our FIBCs

- Safe Working Load : Carrying capacity from 500 kgs to 2000 kgs. Can customize for higher SWL with standard safety factor.
- Safety Factors : From 5:1 to 8:1 as required by the buyer.
- Fabrics : Coated, uncoated and antistatic in all the colours. Standard FIBC's are white.
- Lifting loops : Available in various styles. designs and colours.
- Liners : Loosly inserted, shaped, formfit.
- Sewing thread : Industrial sewing threads. All colours defined by pantone system.
- Printing : Up to 3 colours and up to 4 sides.
- Document pockets : As per the requirement of buyer - A4 size, A5 size & Zip Lock etc.
- Accesories : Can offer various accesories as per customer requirement.
- Certification : In house and 3rd party certifications.
- U/V Stabilization : All components of FIBC's are UV stabilized.
- 100% Recyclable : All parts of FIBC's are recyclable.
- Food Grade : FIBC's are made from food grade polymers and additives.
- Sewing types : Chain stitch, lock stitch, hercules stitch with optional dust proof solution.
- Traceability : Each FIBC's can be traced back to the order Number and production date.

Our Infrastructure

We are equipped with state-of-art machinery at our plant with which we produce our products meeting international standards. Over the years we have strengthened our position in the industry by equipping our plant with sophisticated machinery and continuous improvements in technology.

Our 14,710 square yard manufacturing complex has a environmentally controlled atmosphere and equipped with the complete range of machinery for conversion and finishing.

Collectively we focus on pioneering new and innovative packaging concepts by investing in the latest technologies available.

OUR PROMISE TO CUSTOMERS

Cost effective solution with no compromise in quality

Gulf Plastic Industries values the business of its customers, to enforce this, we use advanced technology infrastructure to offer competetive pricing and a quality product.

Outstanding customer service

We understand the requirements of every sector. Our experienced team is well-versed in the demanding technical and regulatory standards. We have made significant investments in technology, capabilities and talent to meet the high quality specifications of you and your customers.

On time delivery

We understand the cost and complications caused by late delivery so we work with you in a number of ways to significantly reduce the risk of late supply. Exclusive supply chain management team, state-of-art warehouse and strategic geographic location close to air and sea ports ensures our customers receive their goods on time.

How we keep up **OUR PROMISE**

Sourcing the quality raw materials : The quality of the raw material makes the difference in the end product. We have a long-term, closely knit and relationship with the manufacturers of our raw materials. Regular audits of our suppliers assures we are able to monitor the quality of raw materials. Our raw material suppliers being Geographically located near us gives us the advantage of less turn over time.

Testing of raw materials : Raw material screening identifies problem samples prior to use and prevents costly manufacturing defects and delays.

Advanced production infrastructure : We pride ourselves for providing sustainable packaging products that are cost effective and durable. With our state-of-the-art technology and prodigious infrastructure, we have taken product packaging to a new level altogether!

Experienced workforce : We believe that there is more to a world class factory than the infrastructure. Our best resource are our well experienced employees. Our modern factory is designed to provide a positive working environment for our team of more than 350 experienced employees.

Highest quality testing : Gulf Plastic Industries products will undergo rigorous quality control tests before leaving our facility. For instance, when a bulk bag is rated to carry 1,000 kgs, it is tested to withstand over 6,000 kgs for a multi-trip bag, ensuring a built-in safety factor of 6:1.

On-time delivery and customer service : Our first objective is On-time Delivery. We know the importance of having your packaging material when you need it. Delays in delivery of your packaging material can lead to multiplying costs. For this we have set up an exclusive supply chain management team, state-of-art warehouse and ERP systems to support and ensure on time delivery.

Quality Control

PRE PRODUCTION INSPECTION

Physical and computerized checks are conducting to ensure the quality of the raw materials used in production.

IN-PROCESS INSPECTION

Tape and yarn : Every lot of the produced tapes and yarn are checked for its color, denier and strength. Weathering test: Random bales are checked for wrapping, counting and weight.

Woven fabric/webbing : Fabrics produced by every loom is checked manually for color, weaving, width, weight, strength and finishing

Cut components : Components are checked for dimensions

Printed components: Components are checked for print quality, adherence of ink and odour with reference to the specification.

Stitched bags : Each stitched bags are visually inspected for Its stitching, dimensions and accessories.

PE liners : PE liners are tested for width, weight and opacity with reference to the specification.

Tensile test : Tensile and breaking strength of tape yarn and woven fabric are tested using the Universal Testing Method.

Weathering Test : Tape yarn and fabrics are tested for UV stability with reference to the specification using the accelerated UV weathering panel.

FINAL INSPECTION

Packing : Random bales are checked for wrapping, counting and weight

Rig test : Rig test are performed to ensure the safe working load (SWL) of FIBC as per ISO standard

Why choose
Gulf Plastic Industries

- We offer packaging solution for all industries such as food and agriculture, pharmaceutical, chemical, polymer resin, construction, hazardous materials or any bulk packaging
- Over 20+ years of successful delivery of packaging solutions
- Member of EFIBCA, FIBCA (USA) and GPCA
- Customer friendly customization of products
- Products certified by Labordata-Germany, Belgish Verpakking Institute-Belgium
- An ISO 9001, ISO 14001, ISO 45001 company with Integrated Management System
- Infrastructure to produce over 1.5 Million FIBC's per annum
- 99.9% customer retention because of our quality products and services

Our other range of Products

FFS Bags Heavy Duty PE Film

PP Woven Sacks

Disposable Plastic Containers

PE liners

FFS Bags Heavy Duty PE Film

FFS (Form, Fill & Seal) Film PE Roll made with specially blended polyethylene Resins and is available on rolls in tubular form with both printed or unprinted options. It is suitable for high-speed automatic filling machines. Heavy duty FFS Sacks are suitable for packing dry solids and raw materials.

Our 3-layer co-extrusion Polyethylene films feature a strong tack force and stability for FFS machines, maintain strong tear resistance, offer easy film sealing, better machine handling and custom print options.

The tubular FFS film is fed into the filling machine, where it is base-sealed, cut, formed and filled, and then top sealed as a bag.

Additional features of multi-color printing and anti-slip agent options.

Advantages

- Suitable for high-speed automatic FFS filling lines or manual filling
- Heavy duty FFS PE Film with Gusseted tubing available
- provides excellent clarity, glossiness, and stiffness for various applications
- Anti-slip stacking stability on pallet
- High sealing performance, puncture and burst resistance
- UV protection for outside storage

Applications

- Petrochemicals
- Polymers
- Chemicals
- Compounds
- Fertilizers
- Flakes
- Grains
- Minerals
- Salt and Sugar
- Pellets & Granules
- Powders

PP Woven Sacks

Owing to our long term experience in manufacturing of PP woven sacks we can offer our customers the best quality products. Our offer comprises of various types of bags and sacks. We make polypropylene woven bags and sacks according to our customers specifications, concerning dimensions and weights. PP Woven bags are the traditional bags in packaging industry due to their wide variety of usage, flexibility and strength.

Advantages

- Very affordable, lower cost
- Flexible and high strength, persistent durability
- Can be printed on both sides
- Water and dust proof design due to inside PE liners or laminated on the outside; hence, packed materials are protected from outside humidity
- Twisted weave and anti-skid print to prevent slipping
- Fully recyclable

Applications

For packaging of :

- Chemicals, fertilizers, cement, urea, minerals, resin, polymers, rubber
- Flour, grain, seeds, spices, pulses, dates, agro products, fish meal, cattle feed
- Sugar, salt
- Sand, metal parts, concrete elements
- Fruits, vegetables
- Mails / letters / documents

Disposable Plastic Containers

Gulf Plastic Industries specialises in the design and development of packaging to suit the presentation and marketing of your products. These include PP, PS, PET cups, bowls and trays. We are committed to adding new products to our range based on our customer's requirements and needs, using the right mould and machines. All our products are available in plain or customized printing, and in transparent or color material.

Our products are crafted from top grade food resins and are 100% ozone safe. Before delivery, they undergo rigorous quality tests and checks. Our commitment to quality and excellence, has earned us the trust of the most prestigious companies in Middle East.

Advantages

- Affordable price with quality
- Customized product with printing

Applications

- Catering needs
- Beverages
- Fruits and Vegetables
- Dry Fruits and Nuts
- Cakes and Pastries
- Meat and Poultry

جلف باك®
GULFPAC
pack it fresh

PE Liners

We offer LDPE (Low Density Polyethylene) and LLDPE (Linear Low Density Polyethylene) Liners in the form of Loose and Formfit Liners.

Formfit Liners are custom manufactured to fit the internal shape of your flexible intermediate bulk containers (FIBC), ensuring high performance in critical applications such as high speed filling. They eliminate pockets or folds that could trap residual product during filling and emptying.

Advantages

- Versatile sealing applications possible
- Excellent chemical resistance due to selected raw materials Extreme high elongation during uni-axial and multiaxial deformation
- High stress cracking resistance
- Direction independent shear stress transfer with structured surfaces
- Installation advantages with up to 2 m wide liner
- High Melt Flow Index allows an excellent welding performance

Applications

- Store or ship
- Seeds, grains, malt, minerals, pellets, granules
- Construction materials

GULF PLASTIC INDUSTRIES

Our Global Reach

Message from the CHAIRMAN

We are committed to operating our business in a manner that creates value for our clients, shareholders and employees. With over two decades of experience in manufacturing industry, we specialise in producing high quality and cost competitive packaging products for domestic and export markets. We have continuously invest in state-of-the-art design and development, manufacturing and related capabilities as well as in our human resources to deliver superior products and services for the global markets.

- Mohammed Ali Mohammed Al Fannah Al Araimi

Message from the GENERAL MANAGER

Gulf Plastic Industries is committed to providing cost effective high quality products, ensuring we remain at the forefront of technological and process advancements. Our competency includes customer solutions, innovative problem solving and timely deliveries. We offer effective and simplified solutions guided by deep understanding of client needs and a commitment to quality.

- Asok Kumar
